

RootsTalk Advanced Irrigation Solutions

**RootsTalk offers the most efficient way to utilize drip irrigation
An Israeli invention with unmatched economic and ecological performance**

Company

- RootsTalk LLC is a subsidiary of AutoAgronom Israel Ltd, a world leader in precision irrigation and the developer of the Oxygen Availability irrigation control system. AutoAgronom's products have been installed in 15 countries and used for over 100 different types of crops.
- RootsTalk's drip irrigation system enables better exploitation of the plant's genetic potential through optimization of the oxygen availability in the soil solution.
- Plants grown under RootsTalk management will develop an enhanced root system, thereby enabling better absorption of water, nutrients and oxygen.

Results

- At least 30% water and fertilizer savings
- At least 5% yield increase
- Lowest costs for the setup of irrigation projects
- Faster growth; earlier and longer harvest seasons
- Effective utilization of poor soil and water conditions
- Negligible seepage of fertilizers, elimination of salinity, and reduction of greenhouse gases

Suitability

- Suitable for a wide range of crops
- Suitable for any climate or growing environment
- Suitable for most soils or substrates
- Only applicable to drip irrigation
- Requires access to power and water, as well as an internet connection

Our Services

- Remote irrigation and fertigation management
- Design, procure, install and upgrade drip irrigation projects
- Assistance in locating sustainability-related tax benefits and grants
